**PREMIUM QUALITY
WILD BIRD FOOD**

OUR CUSTOMER IS OUR FOCUS

With more than 30 years of experience, Kejo Products has developed an extensive product range that covers every season with innovative, market-leading products. As one of the largest manufacturers of wild bird food products in Europe, we are represented in the European market not only with our brand "COCO-BIRD" but also with numerous private label products. Our quality management processes assures the punctual delivery of our products: even for short-term or large quantity orders. Our team will meet your needs quickly and reliably.

MORE THAN 30 YEARS WITH WILD BIRD FOOD

Kejo Products was founded back in 1992 by Johannes Kehlet. His mission was to be the first company in Europe to offer coconut shells filled with premium wild bird food. The products sold well in Europe, and within a few years it expanded, with new shapes and designs. In the subsequent years, the product range grew extensively adding products such as wood sticks, bamboo tubes, and cones. The entire range is made from 100% natural materials.

In 1995 Frank Kehlet joined the company to take care of export sales, and in 1997 he took over the senior management position. In 1998 the company was moved to a new factory to enable a strategic growth and expansion. During the following years, the range was expanded again, adding suet blocks, suet pellets, filled feeders and suet balls.

In 2009 the production was moved from Denmark to Poland and the factory in Denmark was converted in to a cooling storage to enable the business to produce all year round, and prepare large orders for secure, just-in-time deliveries. This means additional capacity, and cool storage warehousing that will facilitate our best service yet to our customers. We aim to be the no.1 partner in wild bird food products to all our customers in Europe through continuous improvement and innovation.

CARING ABOUT THE ENVIRONMENT

At Kejo Products, we care about the environment, which is why many of our products is nature-based products, which means that they are fully or partly compostable. As well as that, we also do everything in our power to make sure that our packing-materials are recyclable. Finally, we offer a complete range of feeders, which are made of fully recycled materials.

OUR MANUFACTURING SUSTAINABILITY PLAN

We are investing in our plant helping reduce the greenhouse gas emissions and waste impacts of our manufacturing operations as our business grows. Our new production facility uses several new energy conserving improvements.

How are we achieving our targets?

To achieve our targets, such as those relating to our energy usage, we are focusing on three areas of change:

- Embracing new technologies and promoting best practices
- Changing our packaging materials, where possible, to recyclable materials
- Insulating our production facility to reduce heating and cooling energy consumption

Manufacturing programme

Every year we reserve capital investment for projects that reduce energy, plastics, and waste. We are looking for sustainability through continued improvement and investment in new equipment and new machineries. This covers more than one third of our production cost and environmental footprint.

RECYCLABLE

100%
RECYCLING

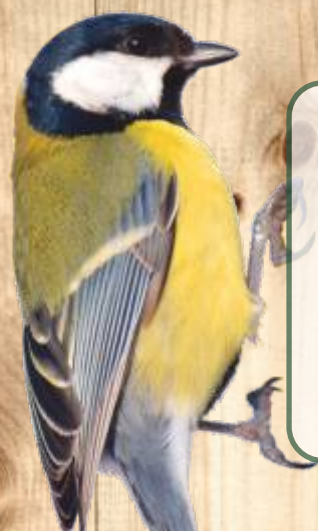

100% NATURAL

All our products are completely natural with no added preservatives. Our products contain the ideal mixture of seed variety, fats, and shredded cereals. Our recipes assure the continued shape of the dumplings until the last peck, making them a very popular, easy-to-use food source. Our Premium Suet Balls are the ideal food source for a variety of wild birds and are available throughout the whole year.

PROVEN QUALITY

Our production is subject to stringent quality controls. Fresh ingredients are critical in our choice of food and we only choose the most recent harvest. We respect a species-specific composition, with high quality raw materials. The most modern bespoke machinery helps us to repeatedly exceed the expectations of our customers, and to constantly develop new products.

SPECIAL PRODUCTS

Our suet products are particularly rich in fat, and offer high energy for wild birds in the winter season. They supplement the natural diet of many bird species. We have added 2 new innovative products this year.

TWO NEW PRODUCTS FOR 2026 – NATURAL SEAGRASS FEEDER FILLED WITH SUET BALLS and 2-PACK CONES FILLED WITH WILD BIRD FOOD

We have developed a new suet ball feeder manufactured from the natural material sea grass. Seagrass meadows are natural and powerful "blue carbon" sinks, sequestering carbon up to 35 times faster than tropical rainforests. We are making use of the old dead growth to make a sustainable feeder. The feeder is pre-filled with suet balls and easy to refill.

Furthermore, we have also developed a 2-pack of cones filled with wild bird food. Each end of the string is attached to separate cone which enables it to be easy hung over a branch. Natural item which is very decorative in the garden.

Look out for these new items which are marked "NEW" in this catalogue.

COCONUT PRODUCTS

COCONUT RECIPE

Regular Recipe:

Beef suet
Seed mixture including
sunflower seeds, millet,
crushed maize, wheat, oat,
sorghum etc.

PEANUT BUTTER PRODUCTS

PEANUT BUTTER PRODUCTS

We often serve sunflower seeds and suet to the wild birds, to name a few; however, there's another high energy food birds love year-round and that's peanut butter. Birds love peanut butter because this creamy specialty provides a quick source of energy.

The peanut butter products we offer are optimized for the birds and makes it easy for them to eat from the various products. We offer peanut butter in many different forms. Peanut butter suet balls work well in suet ball feeders. Peanut butter suet cakes fit in any suet cake feeder. Peanut butter suet pellets can be used in any suet pellet feeder or directly on the feeding table. Finally we got peanut butter filled coconuts and cones ready to hang in the garden. A fantastic range of peanut butter products which make you feed with peanut butter IN A SMARTER WAY.
